AVICTOR
 THE ULTIMATE ADVANTAGE.

MEGAN ROMANO | WORLD CHAMPIONSHIP GOLD MEDALIST

**HYDROSPHERE
 TECHNOLOGY**

Leading-edge technology causes water to surround the fabric, rather than saturate it. The hydrospheric effect optimizes the swimmer's position in the water, thus reducing drag and maximizing speed and efficiency.

**SPEED DRY
 FABRICATION**

Proprietary coating repels water and keeps the suit dry and compressive, keeping swimmers lightweight and fast.

**SUPERSONIC FLEX
 BONDING**

Advanced engineering allows fully bonded seams to conform and stretch with the swimmer's body, resulting in a precisely fitted, ultra compressive suit that won't restrict natural movement.
